|--|--|--|--|
|  | <p>Chainwheels allow operation of overhead valves by means of a slight pull on the chain. Universal design allows chainwheel to be clamped to handwheel or pinned directly to valve stem.</p> |  | <p>Stem guides are designed as wall brackets for installation in treatment plants and pump stations to provide support for valve extension stems. Ductile iron construction with bronze bushing.</p> |
|  | <p>Floor boxes are cast iron and designed for installation in concrete floors or slabs to provide support for extension stems. Overall length is 6 inches. Underside tapped to accept 2½ " NPT pipe nipples of any length for floors thicker than 6 inch.</p> |  | <p>Electric Motor Operators are used to convert manually operated valve to automatic valves. The electric operator can be equipped with a variety of control options to meet customer applications.</p> |
|  | <p>Indicating floor stands are designed for installation in treatment plants and pump stations to allow operation of valves at lower elevation. Body of ductile iron. Position indicator is bronze.</p> |  | <p>Valve extension stems are used to raise the elevation of both buried and "in-plant" valves having a 2" square operating nut.</p> |
